

Beit Shalom APR Report (Abortion Pill Reversal)

From the moment a woman takes the abortion pill, she has about 72 hours to change her mind and save her baby. The abortion pill reversal (APR) procedure can only occur after the first dose of medical abortion (mifepristone/RU-486) is taken orally and is ineffective if the second set of pills (misoprostol) is taken. The abortion pill reversal group claims that, at least within the first 24 hours, odds are up to 62% that the pregnancy will continue. It has worked up to 72 hours, but the earlier the reversal medication, progesterone, is taken, the better the chance of continuing the pregnancy. Donations to Beit Shalom for APR are forwarded to Heartbeat International, the ministry which provides rescue prescriptions through caring physicians.

You have provided- \$4,,246.11:

42

rescue prescriptions, the potential of saving the lives of 40 babies.

Street Church

Plan to go with us Sunday, October 8th at 5 PM with food to the homeless encampment meeting place to minister to the less fortunate.
